## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-7, 9-12, and 15-31 are allowed.

The following is an examiner's statement of reasons for allowance: regarding independent claim 1, the closest prior art of record fails to teach or render obvious the claimed apparatus which comprises a detection space comprising a gas and which operates in an amplification domain that provides magnetron enhanced amplification of the electron signal from the sample. Regarding independent claim 19, the closest prior art of record fails to teach or render obvious the claimed apparatus which comprises a detection space that is arranged for comprising a gas for amplifying electrons emanating from the sample and which operates in an amplification domain that provides magnetron enhanced amplification of the electron signal from the sample. Regarding independent claim 20, the closest prior art of record fails to teach or render obvious the claimed apparatus which comprises a gas that is ionized by the secondary particles to amplify the secondary particle signal and which operates in an amplification domain that provides magnetron enhanced amplification of the electron signal from the sample. Regarding independent claim 26, the closest prior art of record fails to teach or render obvious the claimed apparatus comprising an amplification space including a gas for ionization and gas amplification through a combination of Penning and magnetron effects. Regarding independent claim 30, the closest prior art of record fails to teach or render obvious the claimed apparatus comprising an amplification space between the sample and the first pole of a magnetic immersion lens that includes a gas for ionization.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
